A stock or share (also known as a company's "equity") is a financial instrument that represents ownership in a company or corporation and represents a proportionate claim on its assets (what it owns) and earnings (what it generates in profits).

Stock ownership implies that the shareholder owns a slice of the company equal to the number of shares held as a proportion of the company's total outstanding shares. For instance, an individual or entity that owns 100,000 shares of a company with one million outstanding shares would have a 10% ownership stake in it. Most companies have outstanding shares that run into the millions or billions.

Real estate is a \$217 trillion-dollar market making up almost 60% of all global wealth. It's the largest source of wealth, yet it is illiquid for 99% of the world today. Today, Knox-Globs cut out the expensive middle man and provide access for investors, by investing in shares of real estate using crypto currencies.
